

Undergrad TA in most ECE lecture and laboratory courses: Spring 2022

Reminder: These positions are ONLY available to undergraduates.

Please consider being a UTA (undergrad teaching assistant) for any course in which you have done well. UTA positions are available for a majority of the ECE courses students take as undergraduate. For many students a big reason for doing this is for the sake of the resume and/or graduate school applications. If a professor gets to know you through your UTA work, he or she can write a stronger and more detailed recommendation than would be otherwise possible.

Duties will vary per course, but in most cases a commitment of at least 5 hours/week is necessary for you contribute meaningfully to the course.

Approximate timeline for hiring: we expect to get the most offers to students one week before the start of classes but a few offers will be earlier and a few will be later.

You may also indicate interest in an ECE shop (EE162) student position on this survey. The pay rate is the same.

Applications will be considered until all positions are filled, but earlier applications will receive more consideration.

The pay rate for incoming UTAs is \$11/hour. If this will be your second time as a UTA, \$12/hr, third time or more \$14/hr.
