

Senior Associate, Engineering

Newark, DE (2-3 days a week onsite)

Start Date: 01/08/2024

Base compensation: \$90,000

What You'll Contribute

The Senior Associate, Engineering will be responsible for contributing to the development and implementation of engineering projects, collaborating with cross-functional teams, and helping drive technical excellence within our organization.

What You'll Do

Contribute to the execution of engineering projects, ensuring their successful completion within defined timelines and quality standards.

Develop and implement engineering solutions, adhering to best practices and leveraging appropriate tools and technologies.

Conduct thorough testing and quality assurance to ensure the reliability and performance of deliverables.

Provide technical support and troubleshooting expertise to address issues and challenges encountered during project execution.

Collaborate effectively with cross-functional teams, including product management, design, and operations, to ensure project alignment and successful outcomes.

Communicate project progress, risks, and challenges to stakeholders in a clear and timely manner.

The above information is intended to describe the general nature and level of work performed by employees assigned to this job; it is not designed to contain or be interpreted as a comprehensive inventory of all duties, responsibilities and qualifications required of employees in this role.

What you have

Minimum education, skills and experience required.

Strong technical skills and proficiency in programming languages, software development methodologies, and tools.

Ability to work independently and collaboratively in a team environment.

Strong problem-solving and analytical thinking skills.

Excellent communication and interpersonal skills.

Detail-oriented with a focus on quality and accuracy.

Preferred education, skills, and experience.

Bachelor's degree in Computer Science, Engineering, or a related field.

3 years of experience in software engineering or a related technical role.

The Americans with Disabilities Act

The Americans with Disabilities Act of 1990 (ADA) prohibits discrimination by employers, in compensation and employment opportunities, against qualified individuals with disabilities who, with or without reasonable accommodation, can perform the "essential functions" of a job. A function may be essential for any of several reasons, including: the job exists to perform that function, the employee holding the job was hired for his/her expertise in performing the function, or only a limited number of employees are available to perform that function.
